

ASADBEK UMAROV

FrontendDeveloper(React/Next.js / TypeScript)

Tashkent,Uzbekistan|+998772687865|asadbekumarov1202@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFILE

Frontend Developer with hands-on experience building production interfaces with React, Next.js and TypeScript. Comfortable owning a feature end-to-end: component architecture, state management (Redux Toolkit / RTK Query), REST API integration and responsive UI with Tailwind CSS. Completed an intensive frontend program at Najot Ta'lim and shipped multiple real client and personal projects since. Looking for a Frontend / Junior-Middle Frontend role where I can take ownership of features and grow into a Middle position.

SKILLS

Core: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, React Native

State & Data: Redux Toolkit, RTK Query, REST API integration

Styling: Tailwind CSS, CSS3, responsive / mobile-first design

Tools: Git, GitHub, Figma-to-code workflow

LANGUAGES

- English — Intermediate (B1): comfortable reading technical documentation
- Uzbek — Native

EXPERIENCE

Freelance—SoftTurtkul—"Darrov"WebApp

Aug 2025 – Nov 2025

- Co-developed Darrov, a multi-service Telegram Web App (similar in concept to Yandex Go), as part of a 3-person remote team (1 backend, 2 frontend).
- Built booking and ordering flows across multiple service categories: taxi, food delivery, handyman services (electricians, plumbers, technicians) and product orders from shops.
- Built a responsive UI with React.js, TypeScript and Tailwind CSS, optimized for Telegram's constrained in-app browser.
- Integrated REST APIs to handle real-time orders and service requests; the platform processed 5000+ orders in total, tracked via the admin panel.

PROJECTS

Mann Home—E-commerce Platform | React.js,RTKQuery,TailwindCSS

- Building core frontend modules for an online furniture store, including product catalog, filtering and cart flows.
- Implemented state management and API data handling with RTK Query for efficient caching and reduced re-fetching.

Pubg Tournament Platform — E-sports Tournament Management | Next.js, React

- Co-developed a regional tournament management system covering multiple provinces' e-sports competitions.
- Built dynamic UI components for tournament brackets, registration flows and real-time score updates.
- Used Next.js SSR/SEO features to make tournament pages discoverable and fast-loading.

VocabApp — Vocabulary Learning App | React Native, AsyncStorage

- Personal mobile app for language learners to build and review vocabulary.
- Implemented batch word entry, daily review scheduling and randomized recall tests to reinforce memory.

EDUCATION

Frontend Development in Web Development — Najot Ta'lim

Mar 2024 – Mar 2025

- Intensive program covering modern frontend engineering: React, Next.js, TypeScript, state management and API integration.
- Certificate of Completion — Frontend Development, Najot Ta'lim (awarded May 28, 2025).
